Errata and Corrections to "Device-Free Localization via Dictionary Learning With Difference of Convex Programming"

Xiang Li, Member, IEEE, Shuxue Ding, Member, IEEE, Zhenni Li, Benying Tan

Regretfully, in the Page 5603 of [1], the equations (13),(15) and (16) are incorrect due to the mistake in checking LaTeX.

The incorrect Eq.(13) is

$$x^{(k+1)} = \text{Prox}_{\phi^{(k)}} (x^{(k)} - \phi^{(k)} \nabla \mathcal{L}(x^{(k)}) + z^{(k)})$$

The correct Eq.(13) is

$$x^{(k+1)} = \operatorname{Prox}_{\phi^{(k)}, \lambda} (x^{(k)} - \frac{1}{\phi^{(k)}} \nabla \mathcal{L}(x^{(k)}) + \frac{1}{\phi^{(k)}} z^{(k)})$$

The incorrect Eq.(15) is

$$\boldsymbol{u}^{(k)} = \boldsymbol{x}^{(k)} - \phi^{(k)} \nabla \mathcal{L}(\boldsymbol{x}^{(k)})$$

The correct Eq.(15) is

$$\boldsymbol{u}^{(k)} = \boldsymbol{x}^{(k)} - \frac{1}{\phi^{(k)}} \nabla \mathcal{L}(\boldsymbol{x}^{(k)})$$

The incorrect Eq.(16) is

$$x^{(k+1)} = ST(u^{(k)} + z^{(k)}, \frac{\lambda}{\phi^{(k)}})$$
  
= sign(u^{(k)}) \circ max(|u^{(k)} + z^{(k)}| - \frac{\lambda}{\phi^{(k)}}, 0)

The correct Eq.(16) is

$$\begin{split} \boldsymbol{x}^{(k+1)} = & \mathrm{ST}(\boldsymbol{u}^{(k)} + \frac{1}{\phi^{(k)}} \boldsymbol{z}^{(k)}, \frac{\lambda}{\phi^{(k)}}) \\ = & \mathrm{sign}(\boldsymbol{u}^{(k)} + \frac{1}{\phi^{(k)}} \boldsymbol{z}^{(k)}) \circ \max(|\boldsymbol{u}^{(k)} + \frac{1}{\phi^{(k)}} \boldsymbol{z}^{(k)}| - \frac{\lambda}{\phi^{(k)}}, 0) \end{split}$$

In Algorithm 2, in line 6 and line 7, the corrections are

$$\boldsymbol{u}_{j}^{(k)} = \boldsymbol{x}_{j}^{(k)} - \frac{1}{\boldsymbol{\phi}^{(k)}} \nabla \mathcal{L}(\boldsymbol{x}_{j}^{(k)})$$

$$\boldsymbol{x}_{j}^{(k+1)} = \mathrm{sign}(\boldsymbol{u}_{j}^{(k)} + \frac{1}{\phi^{(k)}} \boldsymbol{z}_{j}^{(k)}) \circ \max(|\boldsymbol{u}_{j}^{(k)} + \frac{1}{\phi^{(k)}} \boldsymbol{z}_{j}^{(k)}| - \frac{\lambda}{\phi^{(k)}}, 0)$$

And  $\gamma$  in Algorithm 2 should be a positive number and greater than 1 according to Eq.(6).
